

Want More Woo Woo?

A field guide to the tarot, manifestation & mystic tools worth a look

Each one below gets a short honest take and what it's actually for, not just a link. Click through only the ones that genuinely fit what you're looking for.

Abundance Arcana

A woman kept pulling the same card every morning — not by accident, but because her deck was speaking to a pattern she hadn't noticed in her waking life. Within weeks, she'd traced it to a habit that was quietly draining her finances.

A tarot system built specifically around abundance and money blocks — helpful if you want readings that go beyond generic "love and fate" spreads.

Manifestation

Manifestation gets a bad reputation from people who treat it like a vending machine — ask and receive, no effort required. The more grounded version is about rewiring daily attention so opportunities you'd normally miss actually register.

A structured manifestation program with daily practices, aimed at people who want more discipline than a vague "just think positive" approach.

Soulmate Sketch

Psychic artist services have been around for decades — the pitch is simple: describe a feeling, and an illustrator renders a face from it. Some people find eerie resemblance to someone real; others treat it as a fun reflection exercise.

A hand-drawn sketch of your described soulmate based on intuitive/psychic impressions — marketed as a novelty and reflection tool, not a guarantee.

Live Psychic Chat

Sometimes you don't want a full reading — you want to type out a question at 1am and get a human response instead of doom-scrolling for answers. That's the appeal of on-demand chat over a scheduled call.

A live chat platform connecting you with psychic readers in real time, for quick questions rather than long sessions.

Prosperity Planner

Most people don't fail their money goals from lack of motivation — they fail because nothing tracks the small daily decisions that add up. A planner works when it turns vague intentions into something you can actually check off.

A printable/digital planner combining goal-setting and manifestation prompts with practical budgeting structure.

Spellsology

Ritual and intention-setting have persisted across cultures for one reason: the act of writing something down, lighting a candle, and committing to a moment of focus genuinely changes how seriously people treat their own goals.

A collection of ritual and "spell" formats for common intentions — love, money, protection — aimed at beginners who want structure rather than open-ended ritual.

Divine Wealth Path

Every wealth program claims a "path." What matters more than the branding is whether it gives you a repeatable practice you'll actually stick with past the first excited week.

A guided course blending spiritual practice with money mindset work, structured as a step-by-step path rather than a single technique.

Pharaoh's Secret

Ancient-Egypt framing shows up a lot in this space — partly for the mystique, partly because Egyptian symbolism (scarabs, ankh, sun disks) has a long documented history as prosperity and protection imagery.

A wealth-and-protection program styled around Egyptian symbolism and ritual, for readers drawn to that aesthetic and tradition.

Power of the Ancestors

Ancestor work is one of the oldest spiritual practices worldwide — the idea that guidance and protection can be drawn from lineage rather than invented from scratch.

A program centered on ancestral connection practices for protection and guidance, distinct in framing from the Egyptian-themed offer above even though they currently share a link.

Audiobook Challenge: Life

Reading goals fail for a boring reason: life gets busy. Audiobooks solve the format problem, but a "challenge" structure solves the follow-through problem by giving you a finish line.

A structured audiobook listening challenge aimed at people who want to build a consistent reading habit without staring at a page.

Audiobook Funnel

This one isn't a book itself — it's a system for people who want to build or promote their own audiobook offer, packaged as a ready-made funnel rather than a DIY build.

A done-for-you funnel template for selling or promoting audiobooks, best suited to creators rather than casual readers.
